

Next Generation Green Schools Program

# Eco-Adventure Field Trips

Environmental education and service to develop young leaders and green our schools

The Next Generation's Green Schools Program offers a wide range of activities to Marin County schools. Our Eco-Adventure field trips are fun, informative and inspiring. Next Generation staff serve as guides and take classes or student groups on custom field trips to select local green businesses, organizations, open spaces, farms, and residences where they have the opportunity to meet and learn from leaders in their community. We also tailor workshops or discussions incorporating sustainability principles and solutions to open and close the trips. Groups are limited to 25 participants per trip. You can also create a trip of your own using some of the locations below.

Destinations May Include	Location	Contact
Open Space Preserve / Watershed	Madrone Canyon (Corte Madera) Santa Margarita Island (San Rafael) Lake Lagunitas Phoenix Lake	parksandopenspace@co.marin.ca.us www.marinwater.org www.marinwater.org
